

Learning to Live Together in a Multicultural Society

Participants with different nationalities will be brought together in a safe space open for dialogue:

- increase the **knowledge** of different ways of life (cultures) around the globe through **discussion** and **critical thinking**
- develop a greater ability among students to **live positively and in an enriching way** with individuals of a different cultural background in a group
- improve the **soft skills** of those participating, such as communication skills, self-confidence, and working in a team

Programme:

- Participants will be working both individually and in a group, both at the Sixth Form's campus and outside.
- One or more group activities relating to the different cultures of those participating will be organised with the input of the participants themselves.
- Participants will organise a portfolio.

➤ Students undertaking the MATSEC course can fulfil the requirement of the Systems of Knowledge project by participating in this course.

Upon successful completion, participants will be awarded a non-formal qualification at MQF Level 3.

**cultural enrichment is enhanced more
through **integration** rather than
segregation**
